EDUCATION

ACHARYA INSTITUTE OF GRADUATE STUDIES

BCA IN COMPUTER APPLICATION

Sept 2021 - July 2024 | Bengaluru, KA

Aggregate CGPA: 8.6/10

KENDRIYA VIDYALAYA SANGATHAN

2020 - 2021 | Manipur, India

Class XII (PCM) | Percentage: 86.6

ASSAM RIFLES HIGH SCHOOL

2018 - 2019 | Manipur, India

Class X | Aggregate CGPA: 6.4/10

COURSEWORK

Data Structures & Algorithms

Machine Learning & AI

Operating System

Java, Python

Software Engineering

Computer Architecture

DBMS, Power BI

Data Analytics

SKILLS

PROGRAMMING

Languages:

- Java
- Python

Database:

- MySQL

Familiar:

- HTML5
- CSS3

- Power BI

OPERATING SYSTEMS

- Linux/Ubuntu

- Windows

TOOLS

- VS Code
- Eclipse

- MySQL Workbench

- Power BI Desktop

EXPERIENCE

ZUMMIT INFOLABS | WEB DEVELOPER INTERN

March 2024 – April 2024 | Bengaluru, India

- Increased user engagement by 30 pct. by designing scalable web apps with Java, Spring Boot, Angular, and MySQL.
- Contributed to a project budget of 150K by collaborating with cross-functional teams on interfaces.
- Enhanced project delivery time by 20 pct. by participating in agile methodologies for feature implementation

PROJECTS

ONLINE EXAM PORTAL - JAVA

[GitHub link](#)

- Designed and developed an **exam portal software** offering a user-friendly platform for hosting quizzes while ensuring ethical participation.
- Implemented **admin** and **student profiles** with role-specific functionalities for efficient management.
- **Optimized performance** with features such as **JWT-based** secured authentication, single-page applications for faster load times, and automatic submission for data preservation.
- **Tech Stack:** Angular, Spring Boot, MySQL.

FLIPKART SALES DASHBOARD - POWER BI

- Build a **dynamic** and **interactive power BI dashboard** to provide comprehensive insights into sales performance for retail Flipkart.
- Analyzed metrics including **top-selling products**, **profit**, **margin**, and **inventory levels**, assisting in optimizing product offerings and profitability.
- Enabled actionable insights for data-driven decision-making across various product categories and geographical region.

JARVIS AI - PYTHON

- Developed a comprehensive Ai with functionality like, speech recognition, voice communication and Real-Time processing.
- Improved user interaction efficiency by implementing advanced conversational AI techniques.
- Reduced task execution time through workflow automation and smart integrations.

CHENNAI WATER LEVEL PREDICTION - ML

- Time-series Analysis for seasonal trends.
- IOT Sensor Data Collection and processing.
- Disaster preparedness through Predictive Analysis.
- Sustainable Urban water Resource planning.

ACHIEVEMENTS

- Won Kala Ratna Award for best Drawing in “All India Drawing Competition 2014-2015”.
- Participation in various competitions at college level.
